FADLI MUHARRAM

FULL STACK DEVELOPER / SOFTWARE ENGINEER

SKILLS

o JS/Typescript
o Nodejs
o React
o Redux
o SCSS
o NextJs
o SQL

EDUCATION

Universitas Nasional

Bachelor of Computer
Science with specialization
of Intelligent System
(Faculty of Communication
and Information Technology),
Cum Laude (3.80)

2015 - 2019

PROFILE

i love everything about code, I am really enjoy learning new things, especialy about latest techology. I found my passion and started learning programming since 2015. That year I started a course on web masters and began to enter college. while i was in collage I built several projects like Realtime Chat, Student Attendace, ect.

After i finished college, i joined Arkademy to learn advance programming with React, Redux,Nodejs, AddonisJs dan AWS, on Bootcamp i learned how to build applications in a short time, and i also have experience in deploying on Google Cloud.

I have a goal to help other with technology, especially programming

EXPERIENCE

Kompas Gramedia | Juni 2019 - Present

- Work with Product Manager and senior software engineer with leveraging global technology stack
- Work closely with UI/UX designer to provide the best experience/interface for users and develop Style Sheets with CSS Pre-Processor (SCSS)
- improve website performance using PWA, Client Side Rendering and Server Side Rendering based on the project being run
- Working collaboratively with Senior Software Engineer to create boilerplate for Backend, Frontend and Hybrid Mobile Application

Arkademy | April 2019

Arkademy is a software engineering program that provides 6 weeks hands-on coding curriculum that focuses on mobile development with NodeJS, React Native as Front-end, AdonisJS as Back-end with JWT Auth workflow, using MySQL relational database, using VCS git and Github, and using AWS EC2 to deploy the app.

PROJECT

Detomatoes

I use this project as my final project with title Disease Detection of Tomato Leaf Plants Using Neural Network Convolution, where the website uses 2 main programming languages python as a server and javascript (React Native) as a client, as well as communication used between client server is RestAPI
Tech: Pyton, Keras, Flask, Rest API, Javascript, React Native, Redux, Firebase, Deep Learning, CNN,

YayasanOTA

This project aims to collect and manage donations via front page and admin page
Tech: PHP, Laravel, RestAPI, ReactJS, SCSS,

please visit my web site for more information about me
